// CORE STACK

React Native · Expo · TypeScript · JavaScript · React · Next.js · HTML · CSS · Laravel · PHP · WordPress · Filament · Node.js · Redux · RESTful APIs · Claude Code · Agile

// TOP SKILLS

- Front-End-Leaning Full-Stack Engineering
- AI-Accelerated Delivery
- Technical Leadership & Mentoring

// CERTIFICATIONS

- FAA Level 3 Award in Supervising First Aid for Mental Health
- ITC Level 3 Award in Outdoor First Aid

// EDUCATION

Wakefield College

HND, Interactive use of Media
2004 - 2006

// SUMMARY

With nearly two decades of digital engineering experience starting in 2006, I build high-impact web applications, websites, and cross-platform mobile apps using React, Next.js, React Native, and TypeScript—from bespoke Laravel and WordPress platforms through to award-winning apps that have secured over 2 million global downloads and prestigious industry awards. Comfortable across the whole stack, from front-end interfaces to RESTful API integration and complex application state (Redux). Adept at scaling feature deployment using modern workflows like Claude Code while actively advocating for workplace wellness on corporate Wellbeing Task Forces.

// EXPERIENCE

Full Stack Developer @ HMA Digital

May 2017 - Present · Barnsley

- Cross-Platform Mobile Engineering: Architect and scale high-performance iOS and Android applications utilising React Native, Expo, and TypeScript.
- Award-Winning Delivery: Engineered the 'Calm Harm' mobile app using TypeScript/Redux, securing 2M+ global downloads and winning a prestigious DBA Gold award.
- Full-Stack Integration: Collaborate across front-end layers to integrate bespoke JavaScript frameworks (Next.js, React) and PHP ecosystems (Laravel, Statamic, WordPress).
- Web Ecosystems: Developed a highly customised, bespoke WordPress platform for 'DigiBete' supporting teenagers with T1 diabetes, winning awards for UI design and effectiveness.
- Modern AI Workflows: Integrated Claude Code to accelerate deployment times while boosting code quality and documentation standards.

Off-Road Ride Leader & MTB Coach @ Peaky Adventures

August 2023 - June 2026 · Sheffield

- Designed and executed professional mountain bike coaching sessions focused on technical skills progression and rider confidence.
- Planned, managed, and led commercial guided off-road group expeditions across complex terrain.

Senior Front-End Developer @ Ledgard Jepson

March 2015 – May 2017 · Sheffield

- Team Leadership: Mentored junior staff and took full responsibility for the technical quality of the team's output.
- Scoping & UI/UX: Partnered with the Digital Director on resource planning and technical estimation; translated designs into highly semantic browser interfaces.

Front-End Developer @ Ledgard Jepson

January 2011 – March 2015 · Sheffield

- Mobile Pioneering: Directed company transition toward responsive web design and mobile app production using PhoneGap.
- App Delivery: Built the 'Wall Tie Product Selector' iOS/Android app using HTML5, SASS, and JavaScript.
- Advanced Web: Engineered offline-capable web applications using HTML5 Local Storage to cache JSON data.

Designer @ Ebuyer

July 2009 – January 2011 · Howden

- Digital Asset Production: Created original digital designs, asset templates, and user interface modifications using semantic XHTML and CSS to strict W3C standards.
- Brand Collaboration: Partnered with internal marketing teams to design print and digital assets for major global technology vendors, including Microsoft, NVIDIA, HP, and Samsung.

Consultant & Visiting Lecturer @ Wakefield College

May 2009 – April 2010 · Wakefield

- Modernised Foundation Degree (FdA) Web Design module structures and lectured on semantic HTML, CSS, and web accessibility standards.

Web User Experience Designer @ TechnoPhobia Ltd.

November 2006 – July 2009 · Sheffield

- Built functional prototypes and templates for high-profile systems, including the South Yorkshire Police recruitment platform.
